## REMARKS

The figures of births and deaths shown in this statement for week ending the 16th June, 1956 relate to 256 towns with an estimated population of 35,145 thousands. The total number of towns is 317 and their population is 41,516 thousands. Thus 81% of the total number of towns representing 85% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 17,900 and 7,598 representing birth and death rates of 26.5 and 11.2 per thousand of population respectively.

(a) *States (Part A and C).*—The data here relate to 210 towns with an estimated population of 28,766 thousands. Information about Assam, could not be included. The total number of towns is 252 and their population is 33,432 thousands. Thus 83% of the total number of towns representing 86% of the total population is covered. The number of births

and deaths recorded in these towns were 15,324 and 6,641 representing birth rates and death rates of 27.7 and 12.0 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of the population.

(b) *States (Part B).*—The data here relate to 46 towns with an estimated population of 6,379 thousands. The total number of towns is 65 and their population is 8,084 thousands. Thus 71% of the total number of towns representing 79% of the total population is covered. The number of births and deaths recorded in these towns were 2,576 and 957 representing birth and death rates of 21.0 and 7.8 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousands of population.
